TITLE

CABLE-WIRING STRUCTURE

ABSTRACT :

PROBLEM TO BE SOLVED: To suppress noise emitted from a cable easily, in a short time.

SOLUTION: A printed wiring board 1 is formed on its upper face with a wiring pattern 2 and is mounted with an IC 4. The printed wiring board 1 is provided on its side edge with a conductive member 7 made of a conductive material. The conductive member 7 is provided with a plurality of cutouts 9 which are formed serially at regular intervals. A cable 6 is connected to the printed wiring board 1 via a connector 3, being alternately caught through the front and the rear faces of the conductive member 7, using the cutouts 9 formed in the conductive member 7.
